EXPERTISE

Macro-Financial Risks, Asset Pricing & Portfolio Optimization, Financial Risk Analysis, Geopolitical Risk Analysis, Time Series Analysis, Operation Research, Political Institutional Analysis, Stakeholder Analysis

EDUCATION

[Fulbright University Vietnam](#), Ho Chi Minh City, Vietnam

August 2024 – (expected) June 2028

[B.A., Economics] GPA: 3.86, Dean Scholarship.

Notable coursework: Macroeconomic Analysis, Investment Management, Vietnam's Politics and Diplomacy, Chinese Political Economy, Geopolitics and Vietnam's Strategies.

[University of Economics HCMC](#), Ho Chi Minh City, Vietnam

September 2022 – June 2024

[B.A., Management Information Systems] GPA: 3.53, dropped out.

EXPERIENCE

[Clickable Impact](#), Ho Chi Minh City, Vietnam

[Contractor, Research Assistant]

July 2025 – August 2025

- Assessed and proposed preliminary framework to improve corporate governance practices (according to the ASEAN Corporate Governance Scoreboard, OECD Principles, IFC Methodology, GRI 2 standards) of energy state-owned enterprises in Vietnam, Thailand, Laos, and Cambodia.

[Contractor, Research Assistant]

April 2024 – April 2024

- Collected, categorized, and performed data validation & explanatory statistical analysis of the semiconductor test & assembly industry in Vietnam.

[New Energy Nexus Vietnam](#), Ho Chi Minh City, Vietnam

[Data Management & Reporting Associate]

March 2024 – February 2025

- Provided domain knowledge and market insights for operations and data-backed strategic planning. Directly reported to the Country Director and assisted senior management in grant fundraising.
- Restructured, operated, and maintained New Energy Nexus Vietnam's database.
- Performed data validation & explanatory statistical analysis of investment instruments, sectors, and general trends for the [Vietnam Climate-Tech Funding Ecosystem Report 2024](#).

[Project Assistant]

November 2023 – February 2024

[Program Intern]

August 2023 – October 2023

RESEARCH PROJECTS

- (Ongoing) A macroeconomics model with land-use right, fine-tuned for explaining the asset-liabilities macro-financial structure of economies such as Vietnam and China.
- (Ongoing) Numerical optimization methods with agent-based modeling for macroeconomic and financial market models.
- AssetLover: A 7-agent LLM-integrated research system for macroeconomics research ([GitHub Repository](#)).
